

## TENNIS - SUPPORT WITH PELOTTE

**Art. no. 1480**

**Function:** Special support for the so-called tennis elbow. The pain can however also be caused by other sports and activities with intensive use of arms, such as golf, rowing, apparatus gymnastics, ball games etc. Overstrain causes irritation of the tendon insertions.

Application of the support at the forearm approx. 5 cm below the elbow joint will effect a relief in this area. Individually adjustable by Velcro closure.

**Colors:** white with blue and red strips.

**Sizes:** Circumference of forearm 5 cm below mid of elbow **Medium** – up to 27 cm  
**Large** – over 27 cm

BORT has developed the ActiveColor Supports especially for simple and uncomplicated self-therapy of general joint troubles. The ActiveColor Support adjusts itself optimally, without restricting, to the natural movement. The compression supports additionally the joint in its physiological mobility.

### Advantages in summary:

- The ActiveColor Supports stabilize the joint without disturbing the mobility.
- The ActiveColor Supports are colored, 6 modern colors can be combined to fit every clothing.
- Every support is now available with a bag permeable to air when travelling.
- There is practically no user risk during movement when wearing the ActiveColor Support.

During resting periods, e. g. over night, the support should not be worn. In case of continued discomfort please consult a doctor.

## STABILO COLOR®

As a further colorful alternative for self-therapy.

ACTIVE SUPPORTS  
FOR LEISURE AND WORK

## WRIST SUPPORT

### Art. no. 1410

**Function:** Problems at the wrist can occur due to a onetime heavy stress (e.g. straining) as well as due to continued overstrain (inflammation of tendon). The ActiveColor Wrist Support with variable Velcro closure braces and offers individually adjustable compression.

**Colors:** white, red, blue, skin, black.

**Indication:** Overstraining prophylaxis, sprains and strains, overstress irritations.

**Sizes:** Circumference of wrist  
**Medium** – up to 19 cm,  
**Large** – over 19 cm

## ELBOW SUPPORT

### Art. no. 1420

**Function:** The ActiveColor Elbow Support with high compression force prevents overstraining of joints, tendons and arm muscles. Recommended for all sports with intensive arm use.

**Colors:** white, red, blue, green, skin, black.

**Indication:** Overstraining prophylaxis, sprains and strains, overstress irritations.

**Sizes:** Circumference of elbow  
**Small** – up to 26 cm  
**Medium** – 26-28 cm  
**Large** – over 28 cm

## THIGH SUPPORT

### Art. no. 1430

**Function:** The ActiveColor Thigh Support is prophylactic to overstress of the thigh muscles. Also suitable for after-treatment of sports injuries at the thigh.

**Colors:** beige, blue

**Indications:** Overstress prophylaxis, strain, irritations caused by stress.

**Sizes:** Thigh circumference  
**Small** – up to 43 cm,  
**Medium** – 43-50 cm,  
**Large** – 50-56 cm,  
**X-Large** – over 56 cm

## KNEE SUPPORT

### Art. no. 1440

**Function:** Overstress and misload of the knee joints are the most frequent handicaps. The ActiveColor Knee Support is non-slipping and provides effective protection against overstress.

**Colors:** white, red, blue, green, skin, black.

**Indication:** Overstraining prophylaxis, sprains and strains, overstress irritations.

**Sizes:** Circumference of knee  
**Small** – up to 32 cm,  
**Medium** – 32-37 cm,  
**Large** – 37-42 cm,  
**X-Large** (blue, skin) – over 42 cm

## ANKLE SUPPORT

### Art. no. 1450

**Function:** The ankle joint is permanently exposed to injuries by twisting, tilting or stumbling. The ActiveColor Ankle Support provides effective bracing and can be worn in athletic as well as in street shoes.

**Colors:** white, red, blue, green, skin, black.

**Indication:** Overstraining prophylaxis, sprains and strains, overstress irritations.

**Sizes:** Circumference of ankle  
**Small** – up to 21 cm,  
**Medium** – 21-23 cm,  
**Large** – 23-25 cm,  
**X-Large** (blue, skin) – over 25 cm
